

Understanding The Hierarchical Nature of Cybersecurity & Privacy Documentation

The ComplianceForge Hierarchical Cybersecurity Governance Framework™ (HCGF) takes a comprehensive view towards the necessary documentation components that are key to being able to demonstrate evidence of due diligence and due care. This framework addresses the interconnectivity of policies, control objectives, standards, guidelines, controls, risks, procedures & metrics. The Secure Controls Framework (SCF) fits into this model by providing the necessary cybersecurity and privacy controls an organization needs to implement to stay both secure and compliant.

ComplianceForge has simplified the concept of the hierarchical nature of cybersecurity and privacy documentation in the following diagram to demonstrate the unique nature of these components, as well as the dependencies that exist:
